Motorized Retractable Screens

- Porches
- Patios
- Garages
- Balconies
- Windows
- Doorways
- Lanais
- Gazebos

...Or any other outside space that needs protecting!

# Residential Applications

## BENEFITS OF TITAN SCREEN™ RETRACTABLE SCREENS

- ✓ In place when you need them; retracted when you don't. Won't obstruct those beautiful views.
- ✓ Protection against damaging solar rays, insects, debris, wind and rain.
- ✓ Reduced energy usage - Solar screen deflects up to 95% of ultra violet solar rays.
- ✓ Available in a variety of colors and screens to enhance the beauty of your property.

## Appearance

The Titan Screen™ Retractable Screen System is aesthetically pleasing, with a discreet hood that can be concealed inside the architecture when installed pre-construction or beautifully integrated into the exterior façade when installed after-market. The two-part track has a hidden seam and no visible fasteners. With four standard colors of housing (plus dozens of special-order colors) and a multitude of screen styles and colors available, Titan Screen™ will compliment the beauty of your home or business while providing protection against unwanted environmental interferences.

# Commercial Applications

## Strength & Quality

The Titan Screen™ Retractable Screen System utilizes a two-piece extruded aluminum bottom bar with no visible seam. The bottom bar houses two internal, marine-grade, 1/2" stainless steel weight bars, heavy enough to keep the screen taut, wrinkle-free and able to move up and down against wind resistance. Designed and manufactured to the highest standards in the industry, all hardware and fixtures are also marine-grade stainless steel, making Titan Screen™ long lasting and rust resistant.

The Acetel injection-molded end caps fully engage in the track, providing low friction, and the Delrin-teeth zipper is RF welded and hidden inside the side track. The bottom brush seal allows for closure on uneven floors. Every thought has been given to ensuring the Titan Screen™ system is *the best in the industry.*

## Why Choose TITAN SCREEN™?

- ✓ Quality Construction
- ✓ Reliable Motors & Electronics
- ✓ Low Maintenance
- ✓ Long Lasting

Powered by  
**somfy**

## Dependability

Titan Screen's™ uniquely-designed side track prevents blowouts in windy conditions. In an Independent Fenestration Lab, Titan Screen™ passed wind-tests in excess of 65 psf. All Titan Screen™ systems feature Somfy motors and electronics for their reliability and ease-of-use. A hand-held remote control is standard and capable of operating multiple units. Titan Screen™ installations have been in place since 2008 and the manufacturing facility is backed by over 52 years of experience.

## Applications

The Titan Screen™ Retractable Screen System provides energy-efficient sun shading, shelter against insects, climate control and rain/wind reduction while allowing outward visibility. Depending on screen selection, Titan Screen™ capable of blocking up to 95% of ultra-violet (UV) rays--saving up to 50% of the energy used to heat and cool homes.

# Features & Fabrics

The perimeter of the screen has a zipper RF welded to the screen. The zipper is retained into the track to eliminate the screen from blowing out.

The screen has a heavy-duty vinyl corner brace to add strength to the screen.

The bottom bar insert retains the bottom bar into the track. This gives the system a finished look while adding strength.

The track entry guide ensures the zipper enters the track properly every time.

Titan Screen™ has a unique two-piece track that has no visible fasteners for a finished look.

The two part bottom bar has two marine-grade stainless steel bars to properly weight the bottom bar. This helps the screen operate in windy conditions.

## Versatility

The **Titan Screen™ Retractable Screen System** is available in widths up to 21 feet (6.4m) and heights up to 18 feet (5.5m). The track system allows you to tailor the system to best suit your needs. Offered in a wide variety of colors and styles, standard fabrics include:

- Solar Screen with 80, 90 or 95% UV protection
- Super Screen for protection against insects, rain/wind, and other debris
- Decorator fabrics in a variety of colors and weaves; and
- Clear Vinyl for maximum climate control.

### Standard Housing Colors

### Solar 80 or 90 Screen Fabric
